PROFESSIONAL SUMMARY

Innovative Full Stack Developer with a strong background in designing, developing, and deploying scalable web applications. Skilled in modern JavaScript frameworks and Python-based backend technologies, with hands-on experience in RESTful API design, database architecture, and cloud deployment. Adept at translating business requirements into technical solutions and collaborating in Agile teams to deliver high-quality software. Passionate about building efficient, user-centered digital products that drive business growth and enhance user experience.

CORE TECHNICAL SKILLS

Frontend Development

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, State Management, Component Architecture

Backend Development

Python, Flask, RESTful API Development, Flask-SQLAlchemy, Authentication & Authorization, Middleware, Server-Side Routing

Database Management

PostgreSQL, MySQL, SQLAlchemy ORM, Database Schema Design, Query Optimization, Data Modeling

DevOps & Deployment

Render, Vercel, GitHub Actions, CI/CD Pipelines, Environment Configuration, Cloud Deployment

Software Engineering Practices

Agile/Scrum Methodologies, Scrum Master Experience, Code Reviews, Test-Driven Development, Debugging, MVC Architecture, Technical Documentation

Tools & Platforms

Git, GitHub, VS Code, Postman, Chrome DevTools, npm/pip, Command Line Interface

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Moringa School

May 2025 – Present | Nairobi, Kenya

- Designed and implemented full-stack web applications using React and Flask, ensuring seamless integration between frontend and backend systems
- Developed RESTful APIs with Flask, implementing secure authentication, data validation, and optimized database queries using SQLAlchemy ORM

- Led Agile ceremonies as **Scrum Master**, facilitating sprint planning, retrospectives, and daily standups to enhance team productivity
- Collaborated with cross-functional teams to define technical requirements, manage sprint backlogs, and deliver high-quality software on schedule
- Conducted code reviews and pair programming sessions to maintain clean, maintainable, and scalable codebases
- Deployed production-ready applications to Render and Vercel, managing environment variables and deployment pipelines
- Debugged and resolved complex issues across the stack, improving system reliability and performance

Teaching Intern | Mwangaza Mixed Secondary School

May – August 2023 | Kenya

- Delivered English and Literature lessons, developing strong communication, leadership, and presentation skills
- Designed structured lesson plans and educational materials, demonstrating analytical thinking and systematic problem-solving
- Applied instructional design principles to technical mentorship, simplifying complex programming concepts for peers and junior developers

PROJECTS

SkillBridge – Freelance Marketplace Platform

Tech Stack: React, Flask, SQLAlchemy, Tailwind CSS, PostgreSQL

- Engineered a full-stack marketplace connecting freelancers with clients, handling complete project lifecycle management
- Implemented secure JWT-based authentication and role-based authorization for client and freelancer user types
- Developed comprehensive RESTful API with 15+ endpoints supporting job posting, bidding, and transaction management
- Designed normalized database schema with foreign key relationships and implemented CRUD operations using SQLAlchemy ORM
- Created responsive, mobile-first UI using Tailwind CSS utility classes and React component composition
- Integrated secure payment tracking system with transaction history and status management
- Deployed backend on Render and frontend on Vercel with environment variable configuration

E-Commerce Web Application

Tech Stack: Flask, SQLAlchemy, JavaScript, HTML5, CSS3

- Built production-ready e-commerce platform supporting product catalog, shopping cart, and order processing workflows
- Implemented RESTful API architecture with proper error handling, input validation, and HTTP status codes
- Designed relational database schema for products, users, orders, and cart items with appropriate indexing
- Developed cart management system with real-time updates using JavaScript Fetch API and DOM manipulation
- Implemented server-side session management for user authentication and shopping cart persistence

Country Explorer App

Tech Stack: React, JSON Server, JavaScript (ES6+), CSS3

- Developed interactive SPA (Single Page Application) for exploring global country data with advanced filtering capabilities
- Implemented client-side routing and dynamic rendering using React hooks (useState, useEffect, useContext)
- Integrated RESTful API consumption with asynchronous data fetching and error handling
- Built search functionality with debouncing and multi-parameter filtering (region, population, language)
- Optimized component rendering performance using React.memo and callback memoization

Guestbook Application

Tech Stack: Vanilla JavaScript, JSON Server, Fetch API

- Created asynchronous web application demonstrating mastery of JavaScript fundamentals and API integration
- Implemented CRUD operations using Fetch API with proper promise handling and error management
- Utilized event delegation for efficient DOM event handling and dynamic content updates
- Applied ES6+ features including arrow functions, template literals, destructuring, and modules

EDUCATION

Software Engineering Certificate – Moringa School, Nairobi, Kenya

Bachelor of Education (Arts) – Maasai Mara University, Narok, Kenya

CERTIFICATIONS

- Agile Project Management Fundamentals
- Responsive Web Design – freeCodeCamp
- Python for Web Development – Moringa School

REFEREES

Bernard Nderitu

Kenya Medical Training College, Kitui
